

AltFuel
Propane conversion kits
for small engines

Generators & Water Pumps

*Easy to start

*Easier to obtain during a Natural disaster

*No winterizing of Application

*No Fuel Waste

*Significantly quieter

*Burns Cleaner

*No Gumming of Carburetor

*Never have to rebuild or replace Carburetor

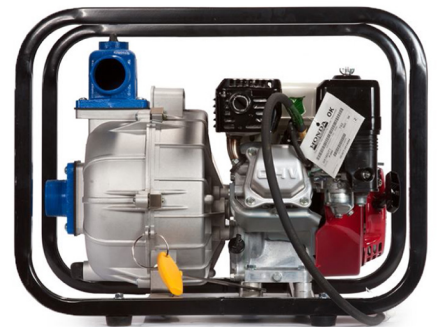

Benefits of propane conversion on pumps & generators

- Earth-friendly alternative to gasoline
- Non-toxic exhaust
- Increased engine life and lower maintenance
- Improved engine performance
- Significantly reduces air pollution
- Conversion kit is simple and easy to install

Stop polluting with gasoline

- 5% of air pollution is from small gasoline engines
- 1 hour of gasoline engine use= 350 auto miles
- 1 gasoline engine creates 87lbs of CO2 per year
- Over 700 million gallons of gasoline spilled yearly
- High cost at the pump
- Increased engine wear and tear vs. propane
